THE PEOPLE GUIDING THE DAY

Meet your host and event director

Two distinct roles, with one shared purpose: keeping the day focused on useful conversations and deliverable projects.

CONFERENCE CHAIR & HOST

John Curtis

Chair, Net Zero Club | Marketing & Operations Director, The EV Cafe

John is an experienced conference host, journalist and public speaker specialising in sustainability and transport. He will open the conference, guide each session and chair the live Q&A discussions, bringing questions from the host and audience together and helping every contributor take part in practical, project-focused conversations.

[VIEW LINKEDIN](#)[LIVE PROGRAMME](#)

EVENT DIRECTOR

Lee Etchells

Founder, Net Zero Club | Managing Director, Evolutional Ltd

Lee leads the Net Zero Scotland and Net Zero Nations Projects Conferences, creating focused environments where public-sector project owners can exchange knowledge and connect with private-sector delivery partners. His work centres on turning net-zero policy and ambition into practical, deliverable projects.

[VIEW LINKEDIN](#)[NET ZERO CLUB](#)

Keep the conversation moving

Use this guide to follow the live programme, connect with speakers and partners, and turn today's discussions into the next useful project conversation.

PROGRAMME

Your day at a glance

08:15	Registration opens Tea & coffee + VIPP Networking Surgery.
09:15	Chair's welcome - John Curtis
09:25	Session 1 Cities, regions & the built environment.
10:25	Session 1 Q&A
10:40	Networking / refreshment break
12:00	Session 2 Design, construction & retrofit challenges.
13:00	Session 2 Q&A
13:15	Networking lunch
14:30	Session 3 Transport, infrastructure & mobility.
15:30	Session 3 Q&A
15:45	Conference close

THE THREE CONVERSATIONS

01. Places & energy

Heat networks, energy security, public-estate flexibility and strategic estate decarbonisation.

02. Buildings & retrofit

Healthy buildings, ground-source heat, customer support, procurement and practical heating choices.

03. Transport & infrastructure

Transport transition, HGV charging, renewable fuels, ports and clean-fuels innovation.

[OPEN LIVE PROGRAMME](#)

SESSION 1

01

Decarbonising Cities, Regions & the Built Environment

How do Scotland's cities, regions and public estates move from targets and individual technologies to coordinated, resilient and investable decarbonisation programmes?

QUESTIONS TO CARRY INTO THE ROOM

Where can heat networks unlock scale and affordability?

How can public estates turn energy assets into operational and financial value?

What does an evidence-led estate decarbonisation roadmap look like?

LIVE PROGRAMME

WHO CAN HELP?

09:25

SESSION 1 / SCOTTISH GOVERNMENT

Stephen Gethins MSP

Minister for Europe, External Affairs and Energy

Scottish Government
Riaghaltas na h-Alba**Keynote Session Address**

Stephen Gethins MSP was appointed Minister for Europe, External Affairs and Energy in May 2026. A former MP and academic, he has worked internationally on peace-building, arms control and democracy, served in Brussels and Scotland House, and was Professor of Practice in International Relations at the University of St Andrews. He was elected MSP for Dundee City East in May 2026.

OPEN PROGRAMME

ORGANISATION

09:35

SESSION 1 / HEAT NETWORK SCOTLAND

Helen Melone

Founding Director, Policy & Public Affairs Lead

Heat
Network
Scotland**Heat Network Scotland - A Home and a Voice for the Heat Network Sector in Scotland**

Helen Melone is a Founding Director and Policy & Public Affairs Lead at Heat Network Scotland, the national membership organisation bringing together government, industry, communities and academia. She has more than twelve years' experience shaping Scotland's low-carbon heat, fuel-poverty and energy policy, and leads policy development, public affairs and stakeholder engagement to support the growth of Scotland's heat-network sector.

PROFILE

ORGANISATION

09:45

SESSION 1 / VEOLIA UK

Andrew Whitworth

Head of Building Energy Services

**From Net Zero to Energy Security: Abundance Does Not Create Energy Sovereignty. Control Does.**

Andrew has worked in the energy sector for more than ten years, moving from an engineering background into business development within Veolia's Building Energy Services team. He works with businesses and public-sector organisations to translate net-zero ambition into practical programmes for decarbonisation, energy resilience and building performance.

PROFILE

ORGANISATION

09:55

SESSION 1 / AQUATHERM UK

Chris Willis

Business Development Manager

**Decarbonising Heat Networks with Sustainable Polypropylene Pipework**

Chris explores how modern polypropylene piping systems can support lower-carbon heating and cooling networks. The presentation considers reduced heat loss, corrosion resistance, faster installation, long service life and the carbon advantages of polypropylene compared with traditional metallic pipework.

PROFILE

ORGANISATION

10:05

SESSION 1 / GRIDBEYOND

Phil Best

Director, Public Sector

GridBeyond

The Hidden Value in the Public Estate

Phil Best leads GridBeyond's development of energy-optimisation and flexibility solutions across the UK public sector. He works with local authorities, NHS organisations, universities and housing providers to unlock greater value from distributed energy assets including battery storage, CHP, solar and EV charging, helping organisations move beyond installation towards active participation in the evolving energy system.

PROFILE

ORGANISATION

10:15

SESSION 1 / TWELVETREES DIGITAL BUILDINGS

Dr John Hindley

Director & Chief Decarbonist | Co-presenter: Jess Boyd, Technical Sales Lead

Twelvetimes
DIGITAL BUILDINGS

Cutting Through Complexities of Estate Decarbonisation: A Strategic Energy-Efficiency and Decarbonisation Solution

Dr John Hindley is a sector leader in sustainability and decarbonisation, drawing on more than twenty years in higher-education estates, strategic net-zero planning, digital buildings, stakeholder management and energy infrastructure. With Jess Boyd, he will set out practical, evidence-based pathways for organisational carbon reduction and future-ready estates.

PROFILE

ORGANISATION

SESSION 2

02

Overcoming Design, Construction & Retrofit Challenges

The second session moves into the detail of buildings and homes: how projects are specified, procured, installed, funded and made to work for the people who ultimately use them.

QUESTIONS TO CARRY INTO THE ROOM

How do we protect building performance while controlling cost?

Where can collaboration create repeatable retrofit at regional scale?

How do customer support, procurement and technology choices shape real outcomes?

[LIVE PROGRAMME](#)[WHO CAN HELP?](#)

SESSION 2 / SCOTTISH PROCUREMENT ALLIANCE

Heather O'Donnell

Senior Technical Support Manager - Scotland

**Making The Impossible That Little Bit More Possible**

Design, Construction and Retrofit Challenges

Heather supports around 140 public-sector organisations and almost 300 appointed companies through SPA. Her work spans new-build housing, internal upgrades, compliance, net zero, public buildings and infrastructure, with support ranging from pre-start and progress meetings to price verification, specification advice and early supplier involvement. She also helps develop regionally focused frameworks aligned with sector requirements and future aspirations.

12:00

PROFILE

ORGANISATION

SESSION 2 / A. PROCTOR GROUP

Pamela Howat

Senior Technical Advisor

**Healthy Buildings by Design: From Building Physics to Practical Solutions**

Pamela Howat is A. Proctor Group's Senior Technical Advisor and has more than 24 years' experience with the company. She provides expert technical support across the building envelope and contributes to research and product development. Her hands-on work through the APG Techdesk is supported by training across the product range and specialist software including AutoPsi, CAD and WUFI Analysis.

12:10

PROFILE

ORGANISATION

12:20

SESSION 2 / KENSA GROUP

Mark Potter

Regional Manager, North & Scotland

**Decarbonising Housing Stock Using Networked Ground Source Heat Pumps**

Mark Potter has nearly twenty years' experience in renewable heating, funding and compliance. He works with housing providers and developers to deliver ground-source heat-pump solutions that support net-zero goals, reduce carbon emissions and tackle fuel poverty. Mark contributes to industry groups including Heat Network Scotland, the Greater Manchester Combined Authority Low Carbon Working Group and the Centre for Net Zero's High Density Buildings Working Group.

PROFILE

ORGANISATION

12:30

SESSION 2 / EILDON HOUSING ASSOCIATION

Liam McGuckin

Sustainability Co-ordinator

**A Collaborative Regional Approach to Asset Decarbonisation**

Liam McGuckin is Eildon Housing Association's Sustainability Co-ordinator and holds an MSc in Environmental Sustainability. He has delivered major retrofit projects and trialled new technologies in social housing. His presentation explores a cross-RSL approach using shared housing archetypes, modelled performance and a Power BI mapping platform to identify coordinated retrofit, collaboration and joint-funding opportunities across the Scottish Borders.

PROFILE

ORGANISATION

12:40

SESSION 2 / KINGDOM HOUSING ASSOCIATION

Annelise Miller

Sustainability Officer

Building a Collaborative, Wraparound Customer Support Offering After Retrofit

Annelise Miller supports Kingdom Group's sustainability objectives, drawing on an MSc in Future Infrastructure, Climate Change and Sustainability and an earlier career in bioengineering. The presentation explores Kingdom's work with St Andrews Environmental Network to provide wraparound energy advice and education for customers receiving comprehensive retrofit works in Largoward, helping residents understand and benefit from new measures.

PROFILE

ORGANISATION

12:50

SESSION 2 / INTERGAS HEATING

Stewart Thompson

National Specification Manager - Social Housing & New Build

Decarbonising Heating Doesn't Have to Cost the Earth

Stewart Thompson helps shape heating solutions at the specification stage, working with developers, consultants, housing providers and industry stakeholders. He focuses on embedding efficient, lower-carbon systems into projects from the outset to support long-term performance, reliability and value, while championing solutions that are straightforward to install, manage and maintain and that improve comfort for residents.

PROFILE

ORGANISATION

SESSION 3

03

Accelerating Net Zero Transport, Infrastructure & Mobility

The final session looks at some of the hardest-to-decarbonise parts of the economy: mobility, freight, fuels, ports and the supporting energy infrastructure required to make transition practical.

QUESTIONS TO CARRY INTO THE ROOM

What infrastructure needs to exist before fleets can move at scale?

Where do renewable fuels remain a pragmatic transition tool?

How can ports, energy hubs and clean-fuels projects unlock regional opportunity?

[LIVE PROGRAMME](#)[WHO CAN HELP?](#)

14:30

SESSION 3 / TRANSPORT SCOTLAND

Heather Cowan

Head of Climate Change and Just Transition for Transport

Decarbonising Transport in Scotland

Heather will examine the transition to electric vehicles and the market change required to support it, including charging infrastructure, HGV and freight decarbonisation, active and sustainable travel, links between transport and energy, the skills needed for delivery and the importance of a just transition.

[OPEN PROGRAMME](#)[ORGANISATION](#)

14:40

SESSION 3 / AEGIS ENERGY

Dan Smith

Associate Director

Beyond the Depot: Opportunities for the Electrification of Scottish Long-Haul Heavy Goods Vehicles

Dan Smith works on Aegis Energy's development of public-access clean-energy hubs for commercial transport. He is closely involved in the company's work with the Telford Consortium in Scotland, supported through Transport Scotland's HGV Consortium Builder programme, to address the infrastructure gap affecting long-haul HGV electrification and explore new commercial models for privately financed charging infrastructure.

[OPEN PROGRAMME](#)[ORGANISATION](#)

14:50

SESSION 3 / CERTAS ENERGY / DCC ENERGY

Tom Allen

Head of Bidding & Tendering

Practical Application of Renewable Fuels

Tom Allen works across major public- and private-sector energy opportunities and DCC Energy's transition towards lower-carbon solutions. His role spans complex bids covering conventional and renewable energy services, including liquid fuels, solar PV, generation, M&E services and low-carbon heat. Through DCC Energy and Certas Energy, Tom helps customers and procurement frameworks translate energy-transition objectives into practical, deliverable solutions.

PROFILE

ORGANISATION

15:00

SESSION 3 / EYEMOUTH HARBOUR TRUST

Paul Olvhoj

Business and Community Growth Manager

Charting a Course to Net Zero: Eyemouth Harbour's Development and Sustainability Journey

Paul Olvhoj supports Eyemouth Harbour Trust's development, commercial growth and wider role in the regional economy. Eyemouth has evolved from its traditional fishing and trading base to become an operations and maintenance location for the Neart na Gaoithe offshore-wind farm. Paul is helping position the harbour for future offshore-wind activity, sustainable infrastructure, regional prosperity and the transition to net zero.

OPEN PROGRAMME

ORGANISATION

15:10

SESSION 3 / NET ZERO TECHNOLOGY CENTRE (NZTC)

Tim Dumenil

NZTC Associate

**NZTC Energy Hubs: The Clean Fuels 2035 Mission and Inverness Freight Vessel Clean Fuels Project**

Tim Dumenil has more than three decades' experience across industrial energy efficiency, manufacturing, supply-chain improvement, bioenergy and hydrogen. His work includes green and blue hydrogen, high-temperature heat-pump concepts, carbon management, CCS/CCU, circular economy and resource efficiency. He focuses on practical efficiency and energy-transition outcomes that can make a meaningful contribution to climate mitigation.

GOLD / DELIVERY PARTNERS

Heat Network Scotland

Heat Network Scotland is a membership-based organisation bringing together industry, academia, communities, housing providers and government to support the development of heat networks across Scotland. Its mission is to help deliver a low-carbon, affordable and resilient energy system by building a strong collaborative heat-network community, sharing knowledge and best practice, supporting skills development and providing an independent voice for the sector. Heat Network Scotland focuses specifically on Scotland's policy context, renewable-energy landscape and built environment, helping stakeholders work together to accelerate clean-heat delivery.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Veolia UK

Veolia is a global leader in environmental solutions, specialising in water management, waste management and energy services. Founded in 1853 in France, Veolia operates in over 50 countries and employs approximately 220,000 people worldwide. Veolia's mission is to resource the world through sustainable development, helping cities and industries optimise resource management. Veolia delivers Ecological Transformation for its customers through decarbonisation, depollution and resource regeneration. The company provides innovative solutions for water treatment and distribution, waste recycling and recovery, and energy-efficiency services.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Aquatherm UK

Aquatherm is a global manufacturer of polypropylene piping systems for building services and plant engineering, with more than 50 years experience and representation in around 70 countries. Its corrosion-resistant PP systems are used across heating and cooling networks, district and local energy schemes, data centres, drinking water, refrigeration, fire protection and surface heating and cooling. Aquatherm's solutions include pre-insulated systems for heat and cold distribution, designed to provide a lightweight, durable and low-maintenance alternative to traditional metallic pipework while supporting efficient installation and long-term building performance.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

GridBeyond

At GridBeyond, we believe every energy asset has the power to accelerate the transition to net zero. We connect businesses and renewable generators to real-time energy markets through AI-driven optimisation, unlocking flexibility, reducing costs and enabling new revenue streams. Our VPP and DERMS platform unifies assets to deliver smarter forecasting, automated control and energy trading, helping organisations thrive while supporting a cleaner, more resilient grid.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Twelvetrees Digital Buildings

Twelvetrees Digital Buildings is a family-owned business with a proven track record of delivering innovative digital building, energy and decarbonisation solutions that create lasting social, environmental and operational value. Guided by our principle of “Doing Work for Good”, we help organisations improve building performance, occupant wellbeing and sustainability outcomes. Our expertise spans building performance analytics, environmental monitoring, hydraulic digital twinning and energy optimisation. Through our proprietary Energy & Decarbonisation Hub, we provide insight, benchmarking and portfolio-wide performance management, enabling clients to reduce carbon emissions, lower costs and make informed decisions that deliver measurable, long-term benefits.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Scottish Procurement Alliance

The Scottish Procurement Alliance (SPA) is an accredited provider of gold-standard frameworks for the public sector. Since SPA was formed in 2016, it has grown to become a procurement provider of choice for organisations across Scotland. SPA develops localised and community-focused solutions for construction, refurbishment, maintenance and consultancy across social housing and public buildings. These are complemented by tailored procurement advice, hands-on technical support, dedicated client assistance and community-benefit identification, designed to simplify the procurement journey and accelerate sustainable project delivery. SPA's framework activity has also supported substantial investment in organisations, charities and community groups.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

A. Proctor Group

The A. Proctor Group has been supplying solutions that support the performance of the building envelope for over 70 years. Its range includes airtightness membranes, vapour control layers, thermal insulation and façade protection systems, supported by technical services including hygrothermal analysis, condensation-risk assessments and thermal modelling. Working across new-build and retrofit projects, the company collaborates with architects, contractors and developers to help inform specification and installation decisions. Visit the team to discuss practical approaches to improving building performance and supporting projects working towards net-zero outcomes.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Kensa Group

The UK's heating system is stuck in the past, costing people and the planet too much. At Kensa, we believe it is time for an upgrade. Since 1999, Kensa has manufactured ground source heat pumps in Cornwall and installed them across the country, transforming how people heat and cool homes and businesses. Its pioneering networked heat-pump solutions aim to deliver a low-cost, low-carbon route to heating at scale while minimising the impact on the electricity grid. Kensa is a major contributor to the UK ground-source heat-pump market and works extensively across social housing, new build and large-scale retrofit.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Intergas Heating

Intergas Heating Solutions is a provider of heating solutions, delivering products and services across residential and commercial applications. With a strong focus on reliability, customer satisfaction and continuous improvement, the company combines engineering expertise with evolving low-carbon technologies to meet changing market needs. Its portfolio includes high-efficiency boilers, air source heat pumps and hybrid heating systems, supporting customers and project teams as they move towards lower-carbon heating. Intergas works closely with developers, consultants, housing providers, installers and other stakeholders to support specification, practical delivery and long-term system performance.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Aegis Energy

Aegis Energy is building a UK clean commercial transport network to accelerate the decarbonisation of commercial transport. With strategically located hubs, high-speed charging and specialist driver-welfare facilities, the company aims to give operators the flexibility and reliability required to decarbonise fleets and future-proof operations. Aegis Energy is the lead partner of the Telford Consortium, which received funding through Transport Scotland's HGV Consortium Builder programme. The consortium is working to tackle the infrastructure gap holding back long-haul HGV electrification in Scotland, including strategically located public charging hubs and new mechanisms designed to unlock private infrastructure capital.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Certas Energy / DCC Energy

Certas Energy is the UK's largest independent distributor of fuel and lubricants, providing energy solutions through an accredited national supply network. The company supports decarbonisation by supplying Hydrotreated Vegetable Oil (HVO), a renewable diesel that can significantly reduce lifecycle greenhouse-gas emissions compared with standard diesel. It also provides bulk fuel delivery, fuel cards, tank infrastructure, telemetry and expert guidance to help customers transition from fossil diesel while maintaining operational performance. As part of the DCC group, the wider team can also support customers across solar, generation, energy storage, M&E services and other transition technologies.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

GOLD / DELIVERY PARTNERS

Net Zero Technology Centre (NZTC)

The Net Zero Technology Centre (NZTC) is a not-for-profit organisation with a mission to work with industry, government and academia, driving technology innovation to accelerate the energy transition to net zero. NZTC co-invests and collaborates with industry and government to develop and deploy new technologies. Its research and insight support Scottish, UK and wider government ambitions to achieve a decarbonised energy system, accelerate technology development, maximise economic opportunity and compete in international markets.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

EXHIBITORS / EVENT PARTNERS

Fibox

Fibox is a global leader in the design and manufacture of high-quality enclosures for protecting electrical and electronic equipment. With Nordic roots dating back to 1966, Fibox combines innovation, durability and technical expertise to deliver dependable solutions for demanding environments. Its portfolio includes polycarbonate, ABS, polyester and aluminium enclosures, alongside customisation services tailored to individual applications. Fibox supports customers across sectors including water and wastewater, renewable energy, transport, telecommunications and industrial automation. From standard products to customised solutions, Fibox helps organisations protect valuable equipment, improve operational reliability and achieve long-term performance.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

EXHIBITORS / EVENT PARTNERS

Woodland Trust

Woodland Trust is the UK's largest woodland conservation charity, dedicated to creating, restoring and protecting native woods and trees for people, wildlife and climate. At the Net Zero Scotland Projects Conference, the team is available to discuss Woodland Carbon Code-registered carbon projects that can help organisations progress towards net zero through high-quality, independently verified UK woodland carbon units. Opportunities include projects in Scotland that combine carbon removal with biodiversity enhancement and community benefits, aiming to deliver measurable environmental and social impact alongside long-term woodland creation and restoration.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

EXHIBITORS / EVENT PARTNERS

Colloide Engineering Systems

Colloide is a process engineering company delivering sustainable water, energy and environmental solutions across the UK and Ireland. With more than 20 years experience in district heating, energy centres, heat pumps, biomass and anaerobic digestion, it can act as principal contractor, specialist sub-contractor or equipment supplier. Its work includes first-of-their-kind projects such as Bunhill 2 Energy Centre and Viking Energy Network, helping clients lower energy costs, improve efficiency and deliver sustainability goals. Through engineering expertise and technology integration, Colloide supports communities and businesses as they transition towards lower-carbon energy and infrastructure.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

EXHIBITORS / EVENT PARTNERS

Heat Pump Warehouse

The Heat Pump Warehouse supplies renewable-heating products to the public and trade, stocking equipment from more than 20 renewable-energy brands. The business supports installers and contractors across the UK with technical guidance, product supply and after-sales support, helping to accelerate the transition to low-carbon heating. It works across the renewable-heating supply chain, connecting manufacturers, installers, contractors and customers with the equipment and technical support required to deliver heat-pump and low-carbon-heating projects. Its range includes heat pumps, cylinders, system kits, accessories and other renewable-heating products.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

EXHIBITORS / EVENT PARTNERS

**4D Energy Advisory Lt**

New Age Energy Consultancy

4D Energy Advisory

4D Energy Advisory Limited is a specialist regulatory and commercial advisory firm focused on decentralised electricity infrastructure. Founded by Aditi Tulpule, with experience spanning Ofgem, Elexon and private practice, 4D combines energy-regulation expertise with real-estate structuring capability. The firm supports developers, investors and network operators to understand regulatory requirements and develop compliant, bankable and scalable energy assets, helping bridge the gap between project ambition, regulation, commercial structure and delivery.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

EXHIBITORS / EVENT PARTNERS

EZO Charging

EZO is an EV charging infrastructure company that develops, operates and maintains charging infrastructure across Ireland and the UK. Working with retailers, local authorities, businesses and property partners, EZO delivers accessible charging solutions for drivers and communities. The network supports a large registered-driver base and thousands of charge points, with growing activity in Scotland. EZO combines public charging, business and fleet solutions with network operations and digital tools, supporting the transition to electric mobility and more connected charging infrastructure.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

PROGRAMME CONTRIBUTORS / ASSOCIATION PARTNERS

Scottish Government

The Scottish Government is the devolved government for Scotland. Its responsibilities include the economy, education, health, justice, rural affairs, housing, environment and climate change, equal opportunities, transport and taxation. It develops and delivers policy and public services across Scotland, working through directorates, executive agencies and public bodies. The government's energy portfolio covers energy policy and strategy, domestic energy efficiency, offshore renewables, industrial decarbonisation, hydrogen, carbon capture, heat networks, building decarbonisation and fuel poverty.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

PROGRAMME CONTRIBUTORS / ASSOCIATION PARTNERS

Kingdom Housing Association

Kingdom Housing Association is a Registered Social Landlord and the parent company of the Kingdom Group, which also includes Kingdom Initiatives and Kingdom Support and Care. Kingdom Group employs over 500 staff and operates across East Central Scotland, providing housing, care and support services to meet a wide range of needs. Since its founding in 1979, Kingdom has developed more than 7,500 affordable homes, predominantly for social rent. In support of its mission "More than a Home", it also runs Kingdom Works, an in-house employability project, and a Community Initiatives programme supporting the delivery of community benefits.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

PROGRAMME CONTRIBUTORS / ASSOCIATION PARTNERS

Transport Scotland

Transport Scotland is the national transport agency for Scotland and an executive agency of the Scottish Government. It delivers the Scottish Government's vision for a sustainable, inclusive, safe and accessible transport system. Its responsibilities span national transport strategy, trunk roads, rail, ferries, buses, active travel, airports, concessionary travel, transport investment and the decarbonisation of Scotland's transport system, with a focus on reducing inequalities, taking climate action, supporting inclusive economic growth and improving health and wellbeing.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

PROGRAMME CONTRIBUTORS / ASSOCIATION PARTNERS

Eildon Housing Association

Eildon Housing Association is an award-winning and growing registered charity in the Scottish Borders, providing Housing and Care Services. It is also the largest provider of new homes of any tenure in the region. With more than fifty years experience, Eildon continues to address social-care and housing needs shortfalls and respond to the changing preferences and aspirations of customers. Its sustainability work includes major retrofit delivery, technology trials and regional collaboration designed to improve building performance, reduce carbon and support affordable warmth for residents.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

PROGRAMME CONTRIBUTORS / ASSOCIATION PARTNERS

Eyemouth Harbour Trust

Eyemouth Harbour Trust is a modern trust port with a heritage spanning centuries. Established by Act of Parliament in 1797, it has long served the region as a vital harbour supporting fishing and commercial trade. Over time, the harbour has adapted to changing industry needs, expanding to accommodate larger fishing and leisure vessels and, more recently, becoming the operations and maintenance base for the Neart na Gaoithe offshore wind farm. Building on this strong foundation, the Trust's next ambition is to develop a new harbour that will meet growing offshore-wind demand, drive regional prosperity, support sustainable development and advance net-zero goals.

[VISIT WEBSITE](#)[BACK TO DIRECTORY](#)

PROGRAMME CONTRIBUTORS / ASSOCIATION PARTNERS

Heads of Planning Scotland

Heads of Planning Scotland (HOPS) is the representative organisation for senior planning officers from Scotland's local authorities and national park authorities. HOPS promotes excellence in public-sector land-use planning, strengthens professional leadership, supports continuous improvement and provides a collective voice on the operation and resourcing of Scotland's planning system. Through its executive and specialist subcommittees, including Climate Change, Energy and Resources, HOPS shares good practice, supports research and policy development and helps planning authorities respond to emerging challenges across infrastructure, housing, climate action, energy and sustainable development.

Warm Homes Projects Conference

Launching in Westminster in November 2027, this inaugural UK-wide conference will turn warm-homes policy into deliverable projects. It will connect pre-qualified public-sector project owners with the private-sector expertise, technology, finance and supply chains needed to improve homes at scale.

THE 2027 FOCUS

Live and planned projects expected to move in the next 10-18 months, spanning retrofit, low-carbon heat, fabric, funding, data, procurement, resident outcomes and delivery. The programme will combine project case studies, expert presentations, panels, exhibition and curated VIPP networking.

NET ZERO CLUB V2

We are rebuilding the year-round platform behind the events.

After the 2026 conference season, the next version of Net Zero Club is intended to connect the pieces that currently sit separately: projects, people, news, case studies, video, events and partner insight.

PROJECTS

Make live and upcoming delivery more visible.

PEOPLE

Connect the community around practical expertise.

CASE STUDIES

Capture what worked, what did not and what comes next.

NEWS + INSIGHT

A stronger year-round editorial engine.

VIDEO

Conference presentations, interviews and expert content.

EVENTS

Scotland, London, Warm Homes and future specialist communities.

Help shape what comes next.

We do not want to rebuild Net Zero Club in isolation. Tell us what would make a year-round project and knowledge community useful to your organisation.
